****The official Washtenaw Community College Graduation Entrance March***
written by Dr. Morris J. Lawrence, Jr., ASCAP.

A Rich History

On January 15, 1965, Washtenaw County residents went to the polls and voted overwhelmingly - 11,109 in favor and 5,085 opposed - to establish Washtenaw Community College and elect its first Board of Trustees.

WCC's first board chair, Samuel Harmon, listed these the following as the most important accomplishments of that first board, which served from 1965 to 1967:

- The decision that the college should be a multi-purpose institution emphasizing technical-vocational programs, while at the same time offering strong college transfer and general education, and
- The decision to pursue an open door admissions policy whereby students are accepted on the basis of what they are ready to do, rather than what they have done.

Since then, Washtenaw Community College has served as an open door to all in the community, while striving to make a difference in people's lives through accessible and excellent educational programs and services.

WCC has continued to meet business and industry needs for an even more highly skilled workforce. Whether pursuing an academic degree or certificate or learning new skills through the college's professional development and continuing education offerings, WCC students receive world-class instruction to prepare them to meet life's many challenges.

Tom Butman

General Manager, Gene Butman Ford

An industry advisory board member for the past 12 years, Tom Butman is a prime example of the ideal employer partner for Washtenaw Community College. His commitment to WCC helps ensure college curriculum meets the needs of the local workforce, resulting in the development of highly skilled employees being sent into the job market.

As General Manager of his family business — Gene Butman Ford in Ypsilanti — Tom Butman also offers apprenticeships and part-time work for our current students, hosts tours for WCC classes and has participated in panel discussions alongside college administrators that highlight the importance of a strong relationship between local business and educational institutions.

Currently, 10 WCC alumni work full-time across multiple departments at Butman Ford — from service to sales to finance to human resources.

Tom is a WCC alumnus himself. After earning a bachelor's degree in Automotive Marketing & Management from Northwood University in 2009, he enrolled in WCC's Automotive Services Technician program to gain an even deeper understanding of every aspect of his family's business.

Academic Processional and Regalia

The origins of academic dress date back to the 12th and 13th centuries, when universities were first taking form. Long gowns were worn and may have been necessary for warmth in unheated buildings. The design of the cap, or mortarboard, resulted from combining two different types of caps commonly worn in medieval times. The first was a black skullcap and the second was a tufted, square cap called a pileus quadratus. The tufted cap evolved into a stiff-cornered cap that would not drape across the wearer's face. The term "mortarboard" was first used in an 1854 novel, The Adventures of Mr. Verdant Green, as a sarcastic reference to the cap's shape.

The master's gown includes a hood that is worn around the neck and hangs down the back. The lining of the hood is the official color or colors of the university that conferred the degree. The velvet trim color indicates the discipline in which the degree was earned. White, taken from the white fur trim of the Oxford and Cambridge Bachelor of Arts hoods, is assigned to arts and letters. Golden yellow, standing for the wealth which scientific research has produced, is assigned to the sciences. Light blue is used for education, dark blue for philosophy and purple for law.

Another major distinguishing characteristic of the gown is the sleeves: associate and bachelor, long pointed; master, oblong; doctor and specialist, bell-shaped. The doctor's gown has a velvet collar facing, and three bars on the sleeves. The specialist's gown is similar to a doctor's except that it has no sleeve bars.

A senior faculty member is the mace-bearer, or marshal of the graduates, and leads the procession. The mace used in Washtenaw's commencement exercises was designed and built by David Byrd, a former faculty member, in the early 1970s. The various parts of the mace represent program areas of the college–a tire for automotive programs, a gear for industrial manufacturing, and a graduated beaker for chemistry and health programs. The top of the mace is a torch of learning, signifying the overall mission of the college.

Key to Symbols

* **Honors: minimum 3.5 grade point average.**

** **High Honors: minimum 3.8 grade point average.**

† **Phi Theta Kappa members**

Graduates' submitted preffered names are used in this program. Legal names will appear on official diplomas.

The red, white and blue cords are worn by veterans of the US military.

The gold cord around the collars of the graduates denotes a standing of honor.

The gold honor stole is worn by members of the Phi Theta Kappa honor society.

The STEM Scholar stole is worn by graduates in the STEM Scholar program.

WCC permits students to participate in commencement before completing all graduation requirements. This program should not be accepted as proof of graduation.
